EURO PT

# Our History

EURO PT entered the world of construction business at 2016, and since that date; we searched for the trending techniques in construction field in order to put our client`s need as our first priority while having a strong focus on quality and safety.

Over the past years; we has built our reputation as a specialized contractor in the field of post tensioning using the latest European technology and with immense support from loyal and faithful customers, and today; we are now widely recognized as one of the leading PT applicators in EGYPT.

## Vision

To deliver innovative, high-quality post-tensioning solutions that enhance the strength, efficiency, and sustainability of modern construction.

## Mission

We aspire to be leading PT services provider and client's first choice in the construction industry , delivering innovation economic solution and quality work while saving time.

## Goals

- Expand Market Reach.
- Innovative Solutions
- Sustainability and Efficiency
- Client-Centric Approach

EURO PT

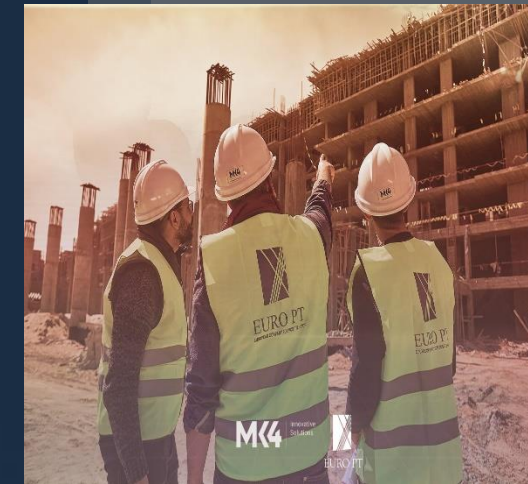

# Our service

- **Engineering Services**

# HEALTH CONCERNS

- Health awareness amongst the workmen will be increased by way of posters, etc. The employees will be introduced to a program of health related subjects to promote awareness, throughout our operations. The subjects will form part of the monthly HSE meetings.
- **EUROPT** will ensure that each employee undergoes a medical examination.
- **EUROPT** must have proper first aid box and all medicines covering his workmen at work places.
- In case of accident the injured should be immediately sent to Client plant medical centre/ dispensary. An accident report in proper format, duly signed by this authorised representative should be submitted to plant concerned head of department.
